

GLOBAL GHOST SOLUTIONS

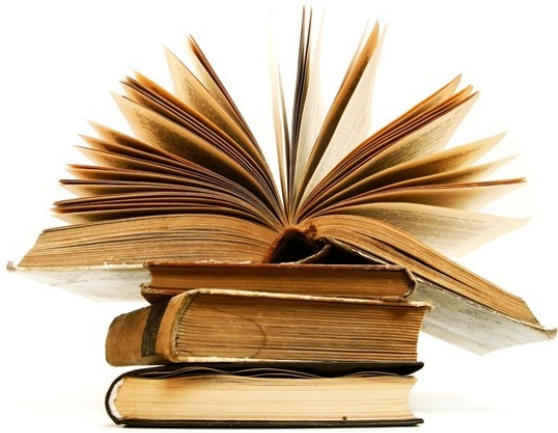

COMPANY BROCHURE

The masculine form has been used in this brochure merely for simple reader's convenience but it intends reported to both the sexes.

The name Global Ghost Solutions refers to the G.G.S. Services Ltd, IVA nr CY 10314635J with corporate headquarters in 5 Petrous Iliadi, Chloe House, office 101, 1087 Nicosia, Cyprus.

**“ Sometimes dreams
come true ”**

Our Company. Our history.

Global Ghost Solutions was born in 1984 and the founder had the dream of creating an international commercial reality to supply equipment for investigations (GPS, bugs and micro-cameras) at very attractive rental prices.

His view was that these devices, although bulky and still defective, would have become powerful tools and of common use with time.

The years, the new technologies and the miniaturization have proven we were right. Nowadays these equipment is used all over the world daily by million of people, from public divisions to private citizens, from police to monitor people and things, to capture criminals, to resolve personal problems, etc...

Our Society was born with the purpose to facilitate the diffusion of this equipment, strongly investing in its purchase and promoting its diffusion by low cost rentals.

From a dream, a view, a correct and futuristic interpretation of the product and the future market, the ambitious project of a man is now a reality of success in continuous growth and expansion.

It began in 1984 with few funds, few tools and the energies of only two persons, but with great trust and desire to do.

Today Global Ghost Solutions offers a net of 6 centres in Europe (Cyprus, United Kingdom, France, Italy, Germany and Austria), it boasts over 50 employees and more than 25 external collaborators and it gathers and resells products of over than 200 Societies all over the world.

To choose Global Ghost Solutions means to choose a reliable and precise partner, in constant growth, that can guarantee seriousness, reliability and operate with professionalism; an UNIQUE partner for any necessity at WORLD level.

“ Limits are made to be broken”

Why to set limits to dreams and expectations?

Been born with the only aim to supply technical equipment for investigations for rent, in the years Global Ghost Solutions has diversified and widened the range of services offered to its clients.

Growing we realized that our business often invaded clearly other adjoining sectors to ours.

We also realized that SERIOUSNESS, PROFESSIONALISM, PUNCTUALITY, CORRECTNESS and COMPETENCE were and unfortunately are words strongly abused by the great part of the Companies without even respecting their meaning and intrinsic value.

Mediocrity and approximation reign supreme over the market; everything is always supplied in an inaccurate way with ambiguous explanations and answers are often elusive and smoky.

From these considerations, the "dream" has gone

“The origin of species”

evolved and changed during the years.

We asked ourselves: “Whether not to try to supply also these services in a clear, serious and professional way?”

At the beginning it has been necessary to place equipment rental and equipment sale side by side for those people who wished to possess the future but they had problems in finding these products (for problems connected to translation and language, for little diffusion, etc...).

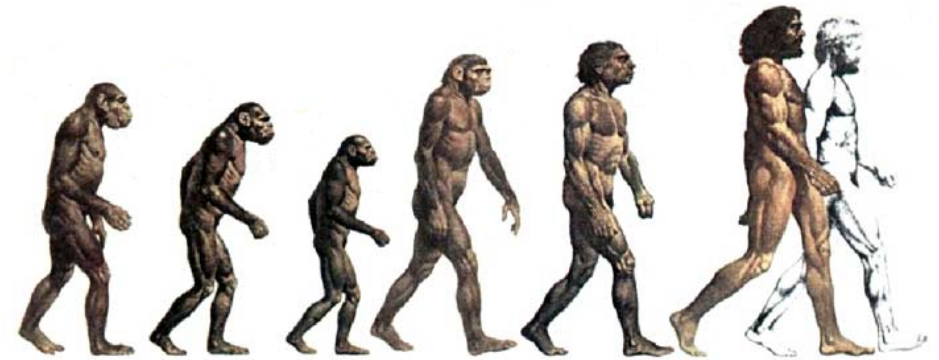

The following footstep toward investigations has been almost forced; the success of these products in the world of the private investigations and our consolidated presence as lessors have always brought our wide number of Clients to ask us about practical aspects of these products. Firstly as providers of agencies for investigations and then as direct executors, the INVESTIGATION DIVISION of our Company have been growing over the years but always founded on PROFESSIONALISM and SERIOUSNESS.

Entered the world of the investigations, the following ring of the chain was the necessity to retrieve the most different information, obvious consequent necessity of the investigation activity.

From that the DIVISION OF INFORMATION was born; initially in order to furnish, for internal use only, data and useful information for the charges of rental or investigation; subsequently as real business compartment and sale product section.

Even in this section in the years Global Ghost Solutions made a very big effort to find SERIOUS and RELIABLE suppliers all over the world, to check them, to build a WORLDWIDE net of professional persons who allow us today to supply any kind of private and public information on natural or juridical persons all over the world.

As proof of what our Company has done in 30 years is our 40-page price list, which contains all kinds of information available in 50 states of the world.

The last footstep in the evolution of Global Ghost Solution is recent and still in development: the service of Mystery shopping.

Adjoining sector but not directly touched by the previous ones, the activity of mystery shopping is the last challenge that Global Ghost Solutions has taken.

The project began in Italy in the second semester of 2014 with the purpose to bring a light of COMPETENCE and PROFESSIONALISM even in this sector.

This business in the last years has found placement into a lot of firms and it sets out in becoming the future in the customer satisfaction and quality control.

Even here our objective is to excel with great performances, serious and professional services, as well

as with very small prices.

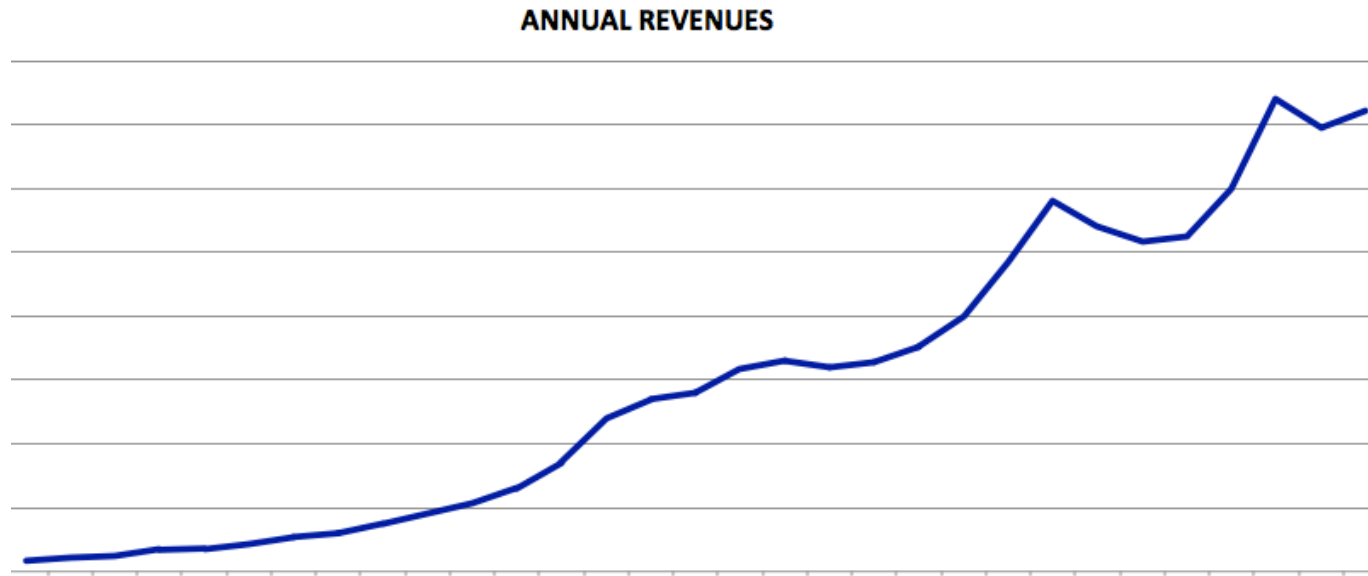

Only the time and the answer of the market will or won't confirm our innovative spirit.

The next challenge?

We don't know what the future holds and where it will bring us... whatever the challenge we will face it with the desire to do anything, the enthusiasm and energy that distinguish us.

"The future belongs to those who dare"

The secret of success

**“The future runs on
the network”**

How did we get to where we are today?

This question is permissible but may a magician reveal his tricks?

Surely love and passion for this job have played a fundamental role in our growth. The careful choice of the geographical areas where to place and to grow our business, the selection of the products and of serious and reliable suppliers, a professional, motivated and happy staff, the constant and stubborn pursuance of our

objectives, our continuous effort to be Professional in our job, all that made the rest.

A secret? Since the beginning we believed in Internet, in that still doubtful and unknown tool and in its power. Our Society has immediately run over and founded its development on the net and it has exploited its potentialities.

A choice that paid off!

Our products

Rental of equipment

Rental of technical equipment for investigations as GPS, micro-cameras and microphones. The rental offers many advantages in comparison with the purchase: small investment and technologies always up with the times. The perfect solution for short time controls of movements, conversations and events. The rental also guarantees a 24/7 professional assistance as well as its use * by specialized staff.

Sale of equipment

Sale and laying of fittings and technical equipment for investigations (such as GPS, micro-cameras and microphones) for a long time monitoring.

Investigations

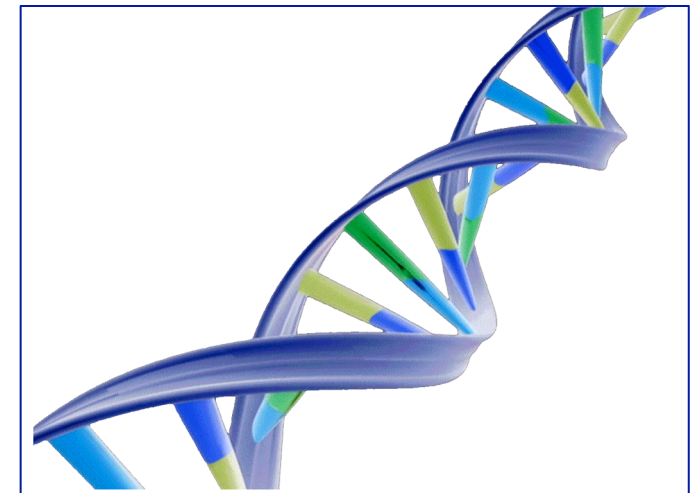

Activity of controlling for unfaithful relationship, minor investigations, absenteeism, black work, etc.

Information

Find any kind of information concerning things, persons, and commercial activities on a world-wide scale. Public and personal data, property, financial and legal information, etc.

Mystery Shopping

Service concerning the quality control for any kind of commercial activity. It consists in secret visits by our appointees into the commercial activity to check and to appraise the image, the quality of the goods and offered services, the professionalism and courtesy of the staff, etc.

* limited option; fee required.

**“ If a competitor is more successful,
maybe it’s because his advertising
strategy is better.**

”

CYPRUS HEADQUARTER

The heart of the Company.

At the headquarters we manage and coordinate all the activities of Global Ghost Solutions. Management, Accounting, central store and logistics are here.

All the orders and the charges of our Clients meet here from the whole world, and here they are elaborated. Suppliers and new products are also sifted here.

The headquarters placed here at the actual address in 2009, after different moves during the years because of its growth.

In the Headquarters 19 people work daily, besides them there are 4 external collaborators to complete the team.

In general these offices follow the clients of the European countries indicated close to here, over obviously all those spread all over the world.

MORE OFFICES?

Following the expansionist polity that made we do in these years, we never exclude any possibility of future expansion...

Potential new Global Ghost Solutions representative offices in Spain, Luxemburg, Bahrain and United States of America are on the table.

“Green generation”

We are a Web Company and we are proud of it.

What does Web Company mean?

It literally means to be a Company of the Web; in practice it means to take advantage of one of the greatest harmless creations of the man (one of the few), Internet, to protect our Planet as much as possible.

The Planet is in crisis, tormented by deep wounds inflicted during decades of intense exploitation and disrespectful economic policies that have mined the health of it, damaged the equilibrium and consumed the resources.

The man, the only actor of this fool, ignores the symptoms of its illness continuing in his devastating action. At this rate within 100 years to colonize other planets won't be a conquest but an urgent necessity for survival!

Therefore our assignment is to repair the damages done in decades of abuses and to find equilibrium of coexistence between our Planet that gives us life and our yearning of expansion.

In our own small way and as far as we can, we strongly work against this intensive exploitation.

How?

Some small expedients which alone represent nothing but if anyone implements them they would make a lot of difference:

- In our offices we use only recycled paper;
- We don't absolutely send and we don't accept (legal and fiscal communications excepted) papery dispatches;
- We purchase electric energy from companies strongly involved in the development of the renewable energies;
- We meticulously separate our rubbish.

Surely "a drop in the sea"... but if each of 7 million people poured a drop ...

Concerning the search of new solutions to find again and to maintain a future equilibrium, we place our trust into smarter brains than ours, confident that they exist and that a cleaner future is possible.

“ We do not inherit the Earth from our ancestors; we borrow it from our children.”
